

PRE-COOLED TULIP BULBS

IMPORTED STOCK NOW READY

ALEXANDER P. THOMAS BULB FARMS * * * P.O. BOX 187 * * * COCOA, FLORIDA

Our prepared, pre-cooled Tulip Bulb stock for late planting in Southern gardens and for pot forcing will be ready for shipment November 10 and later. Orders should be placed immediately. Pre-cooled bulbs make possible beautiful, tall-stemmed tulips even in the deep South where tulips up to now have been somewhat rare. These bulbs can be flowered successfully in central and north Florida and throughout the South. Late planting — Mid-November and through December — is recommended, and bulbs should be planted deep, about 8", in partial shade. Pre-cooled bulbs should be planted promptly upon arrival. Stock will be kept in cold storage until shipment is requested. Color pictures will be furnished ahead of shipment for advance counter sales if requested. Be sure to specify if you want pre-cooled stock. Dry storage stock also available for immediate delivery.

Prices as listed are per 1000; 100 or more per variety priced at the 1000 rate. If you order less than 100 per variety in the Darwin Tulips or less than 50 per variety in Parrot, Red Emperor or Late Flowering Double Tulips, add 10% for special packing.

LATE SEASON QUANTITY DISCOUNTS: Take 10% on orders totaling \$100.00 up to \$250.00; 15% on orders \$250.00 up to \$500.00; 20% on orders \$500.00 and over.
